

UNIQUE INCENSE BOTTLE

How to use :

- 1) Cut off non-coated excess stick (the stem)**
- 2) Attach end of incense stick onto clip.**
- 3) Light other end of incense tip and blow out flame after well lit.**
- 4) Using clip, place lit end of incense stick into top hole of bottle.**
- 5) Long incense sticks may need to be cut down.**

Incense bottle's special hand-made clip is designed to suspend incense sticks within the bottle. If your incense stick does not burn, it may be touching the inside of the bottle. If so, simply turn the clip, and angle the stick away from the glass.
